(54) ELECTRONIC MAIL ARCHIVE SYSTEM

(57) Abstract:

PROBLEM TO BE SOLVED: To generally access to an archive of the electronic mail data.

SOLUTION: An electronic mail reading means 31 reads out the electronic mail data from an electronic mail receiving server 11 in the predetermined condition, and a data base input means 33 houses this data in a general data base 14. The electronic mail data already read by a mail transmission software 12 of the client is read out by an electronic mail reading means 32, and housed in the general data base 14 by the data base input means 33.
